

ESTILAD

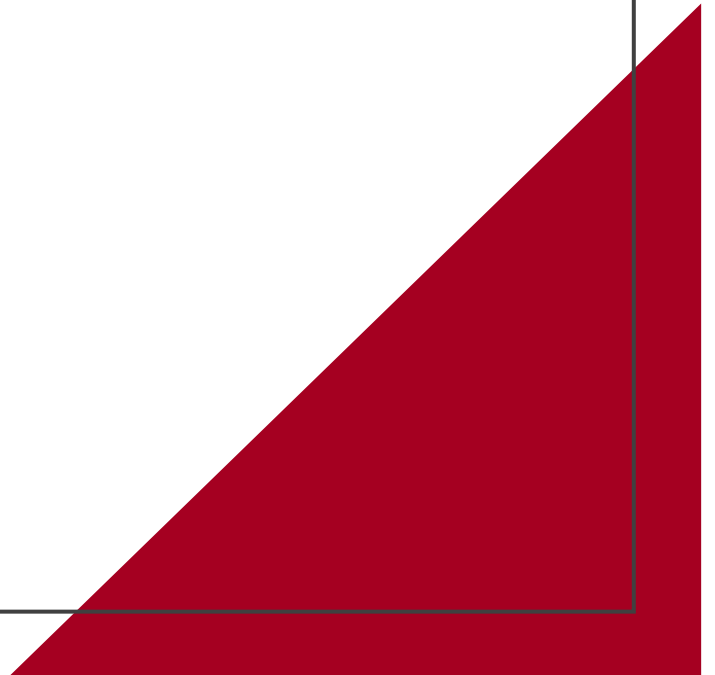

TREATEMENT LINE

ESTILAD FHACE ULTIMATE

- Discover the Science Behind ESTILAD FHACE Ultimate for Vibrant Skin Health
- As skin ages, its natural support system weakens. The decline in essential components like glycosaminoglycans leads to dehydration, paving the way for fine lines and wrinkles. That's where ESTILAD FHACE Ultimate steps in.

- Our groundbreaking formula is powered by hyaluronic acid with varying molecular weights, ensuring superior penetration and efficacy. This deeply hydrating ingredient works wonders, firming and rejuvenating your skin. Featuring a high concentration (3.2%) of purified hyaluronic acid, combining both high (1100–1400 kDA) and low (50 – 80 kDA) molecular weights, we've crafted a low-density, non-cross-linked Hyaluronic Acid. This natural, thermally stabilized form boasts durability comparable to low cross-linking gels.
- ESTILAD FHACE goes beyond hydration; it's a guardian for your skin's integrity. With its high viscosity, it provides essential mechanical protection for tissue and cell layers, reinforcing the skin's defense against stressors. It acts as a conduit for peptide growth factors and structural proteins, aiding in skin healing and tissue repair.
- Designed as a sterile cosmetic solution for professional use, ESTILAD FHACE Ultimate is your ally in promoting skin health and rejuvenation. Experience the transformative power of advanced skincare science today."

ESTILAD WHITENING PLUS

- Discover the cutting-edge formulation of Whitening Plus—a sterile solution packed with innovative ingredients designed to deliver a potent whitening effect while acting as a robust antioxidant.
- This advanced solution targets age spots, pigmentation concerns, and dull skin by addressing various mechanisms responsible for pigment formation. Tranexamic acid, renowned for its specific anti-inflammatory action, not only inhibits tyrosinase synthesis in melanocytes but also prevents pigment transfer within the epidermis, calming the skin and restoring its barrier function.

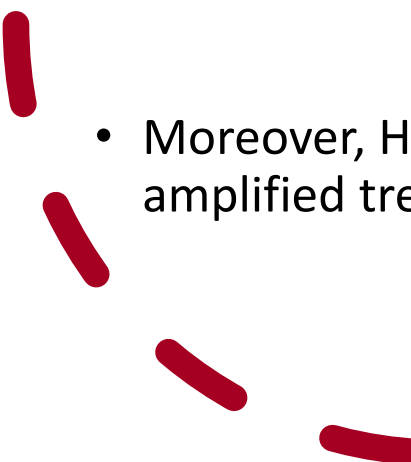

- Glutathione, a key player in thwarting oxidative damage, works across melanogenesis stages to promote skin whitening while safeguarding against environmental stressors. Gatuline® Spot-Light, a safe and natural solution, visibly diminishes age spots by addressing both dermal and epidermal causes of hyperpigmentation, ensuring a brighter complexion.
- Hyaluronic Acid Cube 3®, featuring three molecular weights of hyaluronic acid, deeply hydrates and nourishes, enhancing skin firmness and rejuvenation. Kojic Acid further aids by inhibiting tyrosinase activity, improving pigment disorders like age spots.
- Additionally, Phytexcell Liquorice®, a potent antioxidant, contributes to an even skin tone, illuminating and brightening your complexion for a radiant, revitalized look."

Estilad® HA Cube 3

- HA 2% Cube 3: The Virtual Mesotherapy Solution fortified with 2% Hyaluronic Acid Cube 3, an advanced form known for heightened penetration and efficacy.
- Youthful skin thrives on a well-hydrated dermis with a strong structural network. As skin ages, decreased renewal of dermal components like glycosaminoglycans leads to dehydration, weakening the skin's support and prompting fine lines and wrinkles.

- 
- HA Cube 3 harnesses the power of Hyaluronic Acid Cube 3, incorporating three molecular weights for superior penetration and efficacy. It enhances skin elasticity, smoothness, and reduces moisture loss and wrinkle depth, while promoting tissue repair for firmer, more youthful-looking skin.
 - Widely distributed in connective tissue, Hyaluronic Acid acts as a crucial tissue lubricant, modulating interactions between tissues. HA Cube 3's high viscosity moisturizes and provides crucial mechanical protection to tissue layers (corneal, endothelium, and epithelium), aiding in stress absorption and tissue healing. It acts as a transport vehicle for growth factors and structural proteins, facilitating skin repair.
 - Moreover, HA Cube 3 offers versatility, easily combinable with other Estilad meso solutions for amplified treatment effects."
- 

Estilad® NCTS

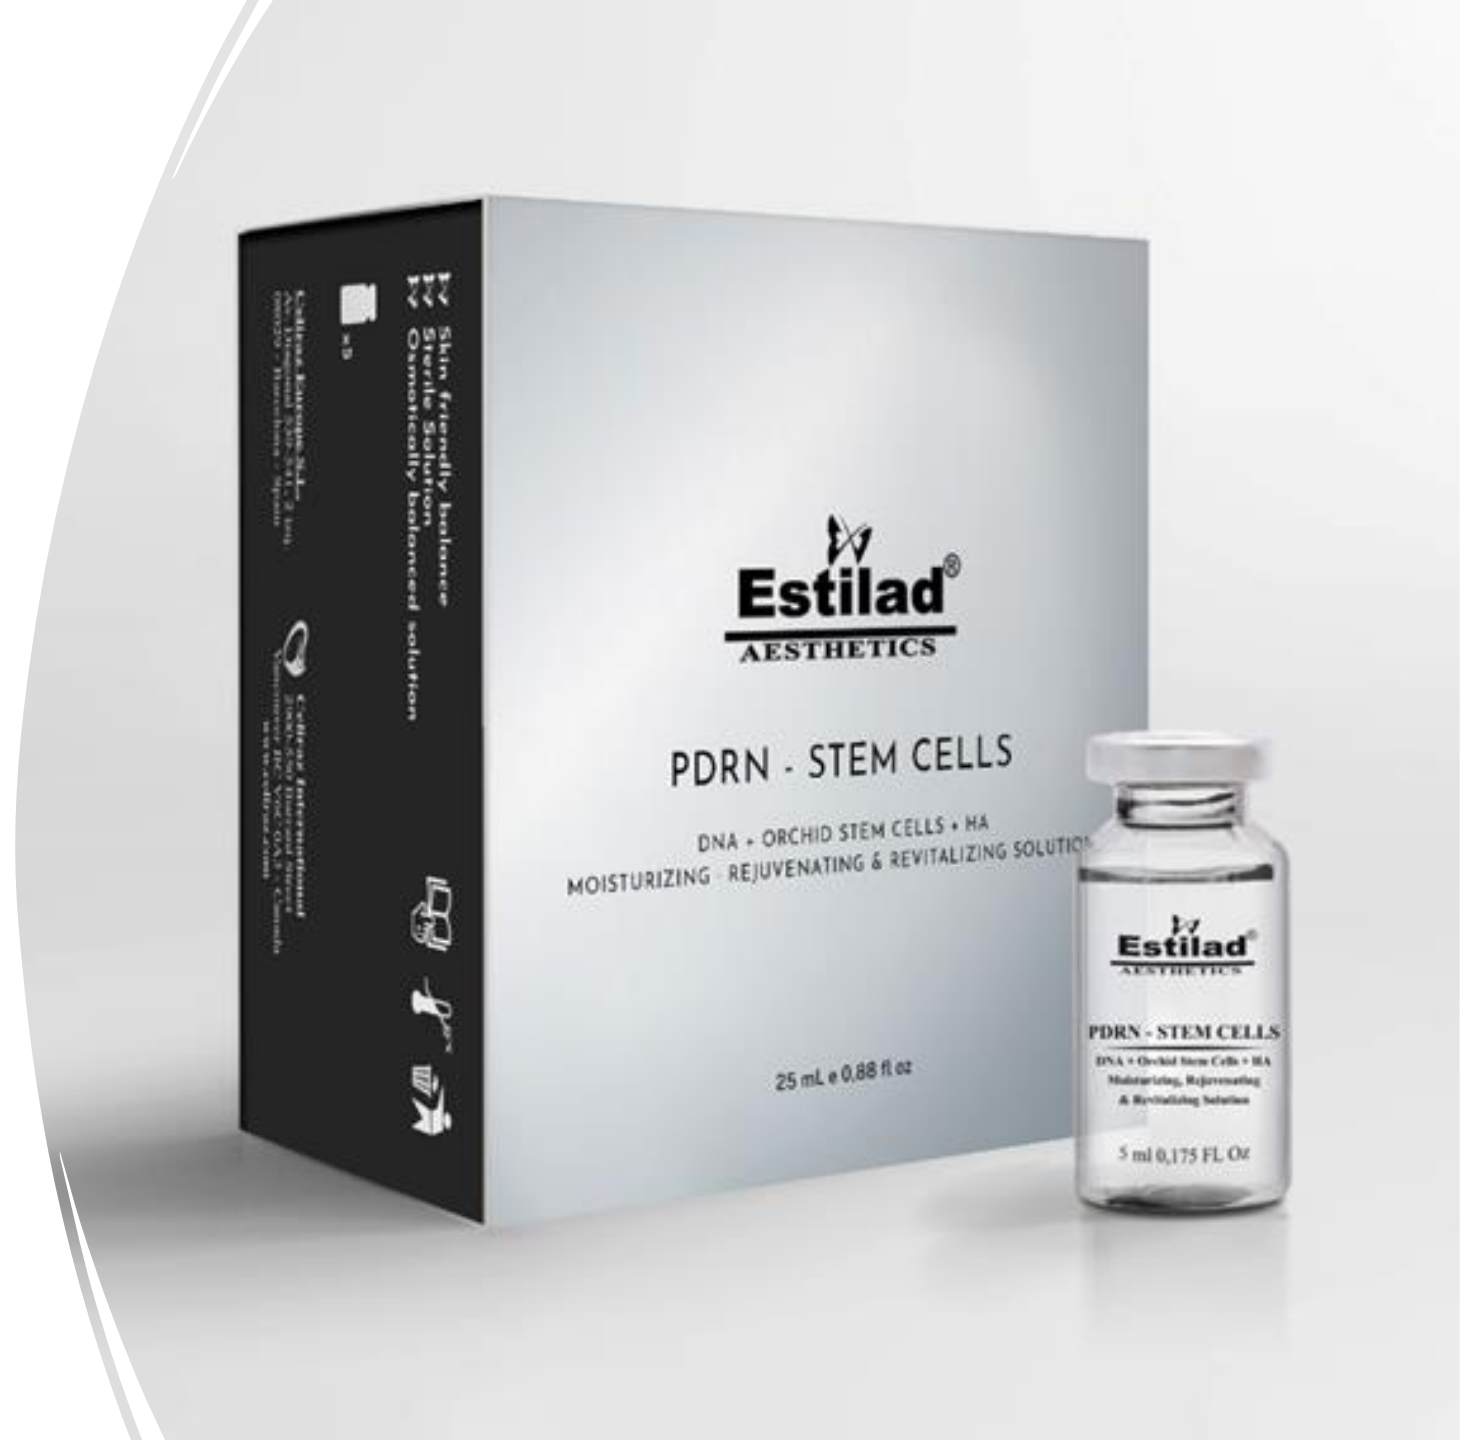

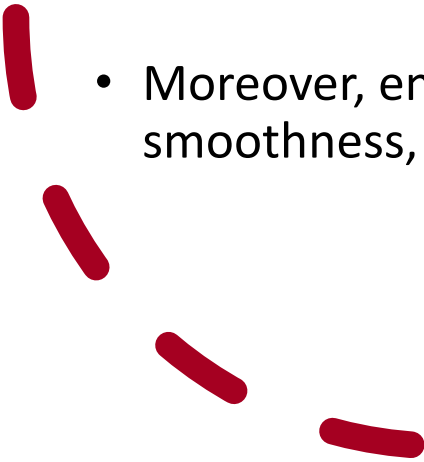

- NCTS presents a specialized treatment solution meticulously formulated to rejuvenate tired, lackluster skin by restoring luminosity and enhancing firmness. This innovative solution targets signs of aging, effectively reducing fine lines and wrinkles.
- Enriched with Hyaluronic Acid Cube3®, containing three molecular weights of hyaluronic acid, NCTS deeply penetrates, improving skin elasticity and smoothness. It actively combats moisture loss and diminishes wrinkle depth, contributing to tissue repair for firmer, more youthful-looking skin.

- Included SNAP 8® and Leuphasyl® are potent peptides known for their ability to relax muscles, reducing the appearance of lines and wrinkles associated with facial expressions. Additionally, Glutathione serves as an antioxidant, aiding in reducing melanin production for a brighter, more even skin tone.
- NCTS blends ingredients that stimulate new skin cell production, promoting natural rejuvenation. Its components support healthy cellular functions and reactions, resulting in a refreshed, revitalized complexion. Abundant in essential vitamins and amino acids, it shields the skin from oxidative damage that accelerates aging.
- Acknowledging the role of hydration in skin health, NCTS includes nutrients that optimize the skin's ability to retain water, ensuring effective and lasting skin hydration.

Estilad® PDRN – STEM CELLS

- Estilad PDRN features a pioneering blend of Polynucleotides, stem cells, and hyaluronic acid, delivering profound hydration, rejuvenation, and revitalization to the skin.
- Polynucleotides (PDRN) have gained widespread recognition in the cosmetology realm for their remarkable ability to internally restore skin structure by boosting collagen production. Derived from herring milk, these potent actives closely mimic the DNA structure shared between herring family fish and human leukocytes. PDRN acts as a DNA fragment, positively influencing cellular processes and homeostasis without toxicity or contraindications, carrying no genetic information and posing no allergic reactions.

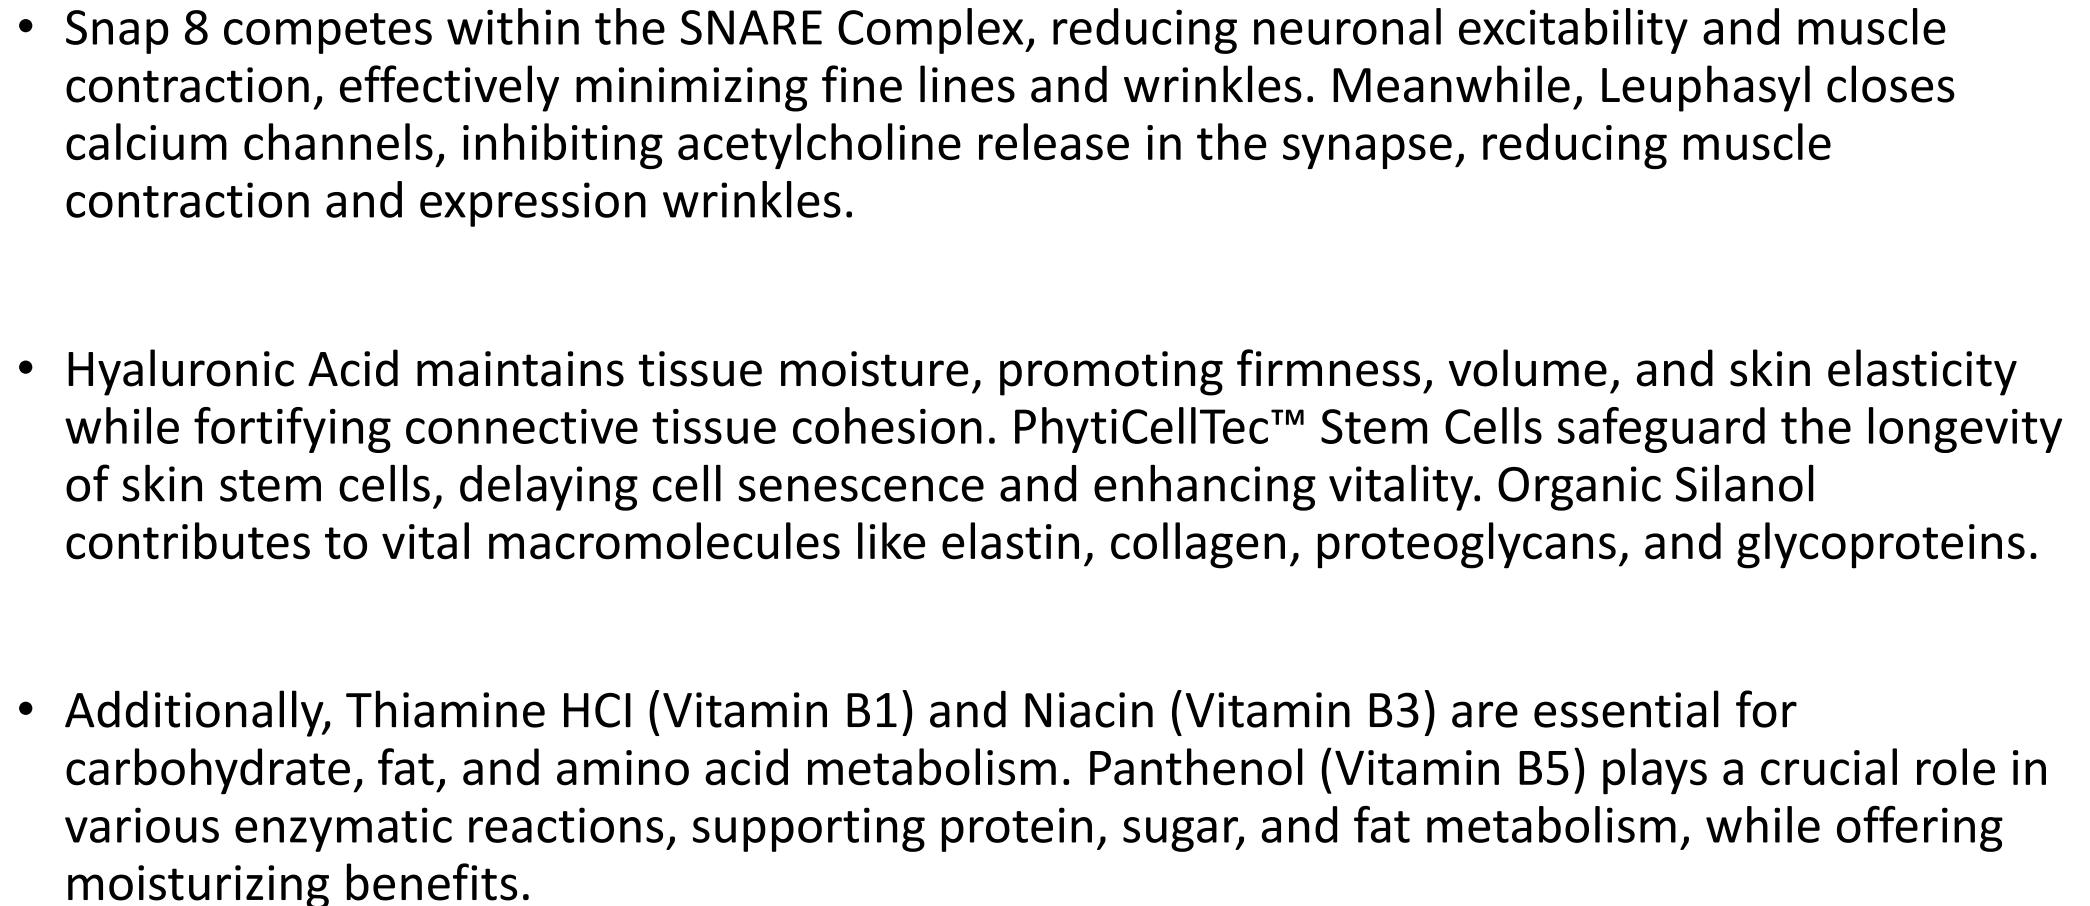

- 
- 
- Estilad's PDRN formulation offers extensive benefits, amplifying cellular metabolic activity, promoting angiogenesis for tissue microcirculation restoration, enhancing hyaluronic acid's moisturizing effect, and reducing pro-inflammatory cytokine TNF- α levels. Additionally, it serves as a potent scavenger of free radicals, safeguarding against damage from metabolites, xenobiotics, and environmental factors while shielding against UVB radiation and preventing pigmentation development.
 - Within Estilad PDRN, stem cells sourced from Canlanthe discolor orchids stimulate crucial genes for maintaining the skin's extracellular matrix, elevating collagen and elastin production and revitalizing fibroblast regenerative potential.
 - Moreover, enriched with Hyaluronic Acid, this formulation enhances skin elasticity and smoothness, combating epidermal moisture loss and diminishing wrinkle depth.

Estilad® Mesobotox with Stem Cells

- Mesobotox with Stem Cells is an advanced facial treatment solution, featuring a muscle relaxant action similar to botulinum toxin. This high-performance formula features a concentrated blend of Snap 8 and Leuphasyl peptides, delivering potent anti-wrinkle and anti-aging effects.
- Targeting expression lines and wrinkles caused by facial movements, Mesobotox naturally relaxes these lines, diminishing their impact. Its formulation includes Hyaluronic Acid Cube 3, featuring three molecular weights for enhanced skin penetration, along with plant-derived Stem Cells, Organic Silicon, and the Snap 8 and Leuphasyl peptides.

- 
- Snap 8 competes within the SNARE Complex, reducing neuronal excitability and muscle contraction, effectively minimizing fine lines and wrinkles. Meanwhile, Leuphasyl closes calcium channels, inhibiting acetylcholine release in the synapse, reducing muscle contraction and expression wrinkles.
 - Hyaluronic Acid maintains tissue moisture, promoting firmness, volume, and skin elasticity while fortifying connective tissue cohesion. PhytiCellTec™ Stem Cells safeguard the longevity of skin stem cells, delaying cell senescence and enhancing vitality. Organic Silanol contributes to vital macromolecules like elastin, collagen, proteoglycans, and glycoproteins.
 - Additionally, Thiamine HCl (Vitamin B1) and Niacin (Vitamin B3) are essential for carbohydrate, fat, and amino acid metabolism. Panthenol (Vitamin B5) plays a crucial role in various enzymatic reactions, supporting protein, sugar, and fat metabolism, while offering moisturizing benefits.

Estilad® Eyebella with Stem Cells

- Eyebella with Stem Cells is an advanced eye contour treatment solution renowned for its triple-action approach targeting the delicate eye area. It effectively diminishes dark circles, under-eye puffiness, and the appearance of fine lines and wrinkles.
- Utilizing Hexapeptide Inylene™, Eyebella exhibits a Botox-like effect by impeding neurotransmission, preventing muscle contractions, and reducing expression lines around the eyes for a smoother appearance.

- The combination of Tetrapeptide Eyeseryl™, Ruscus, and Caffeine works synergistically to decongest under-eye bags caused by poor lymphatic circulation or high capillary permeability. This solution further inhibits collagen glycation, preserving elasticity, preventing bag formation, lightening dark circles, and rejuvenating the eye area.
- Featuring PhytiCellTec™ Stem Cells of plant origin, Eyebella softens fine lines and wrinkles while enhancing skin firmness and tone. Additionally, the inclusion of Hyaluronic Acid Cube 3, comprising three molecular weights, facilitates superior penetration and efficacy in improving skin elasticity, smoothness, and reducing wrinkle depth by regulating tissue repair for a more youthful appearance.
- Eyebella also integrates D-panthenol (Vitamin B5), Niacin (Vitamin B3), and Thiamine HCl (Vitamin B1), fostering skin moisture retention and acting as antioxidants to shield cells from oxidative stress.

Estilad® Stop Acne

Stop Acne is a professional, sterile solution formulated to effectively address both inflammatory and non-inflammatory acne concerns. This comprehensive solution regulates and reduces pimples, controls excess sebum, eliminates dead skin and bacteria, and delivers a potent anti-inflammatory effect. Its keratolytic action helps normalize skin issues and rejuvenates the skin's appearance and tone.

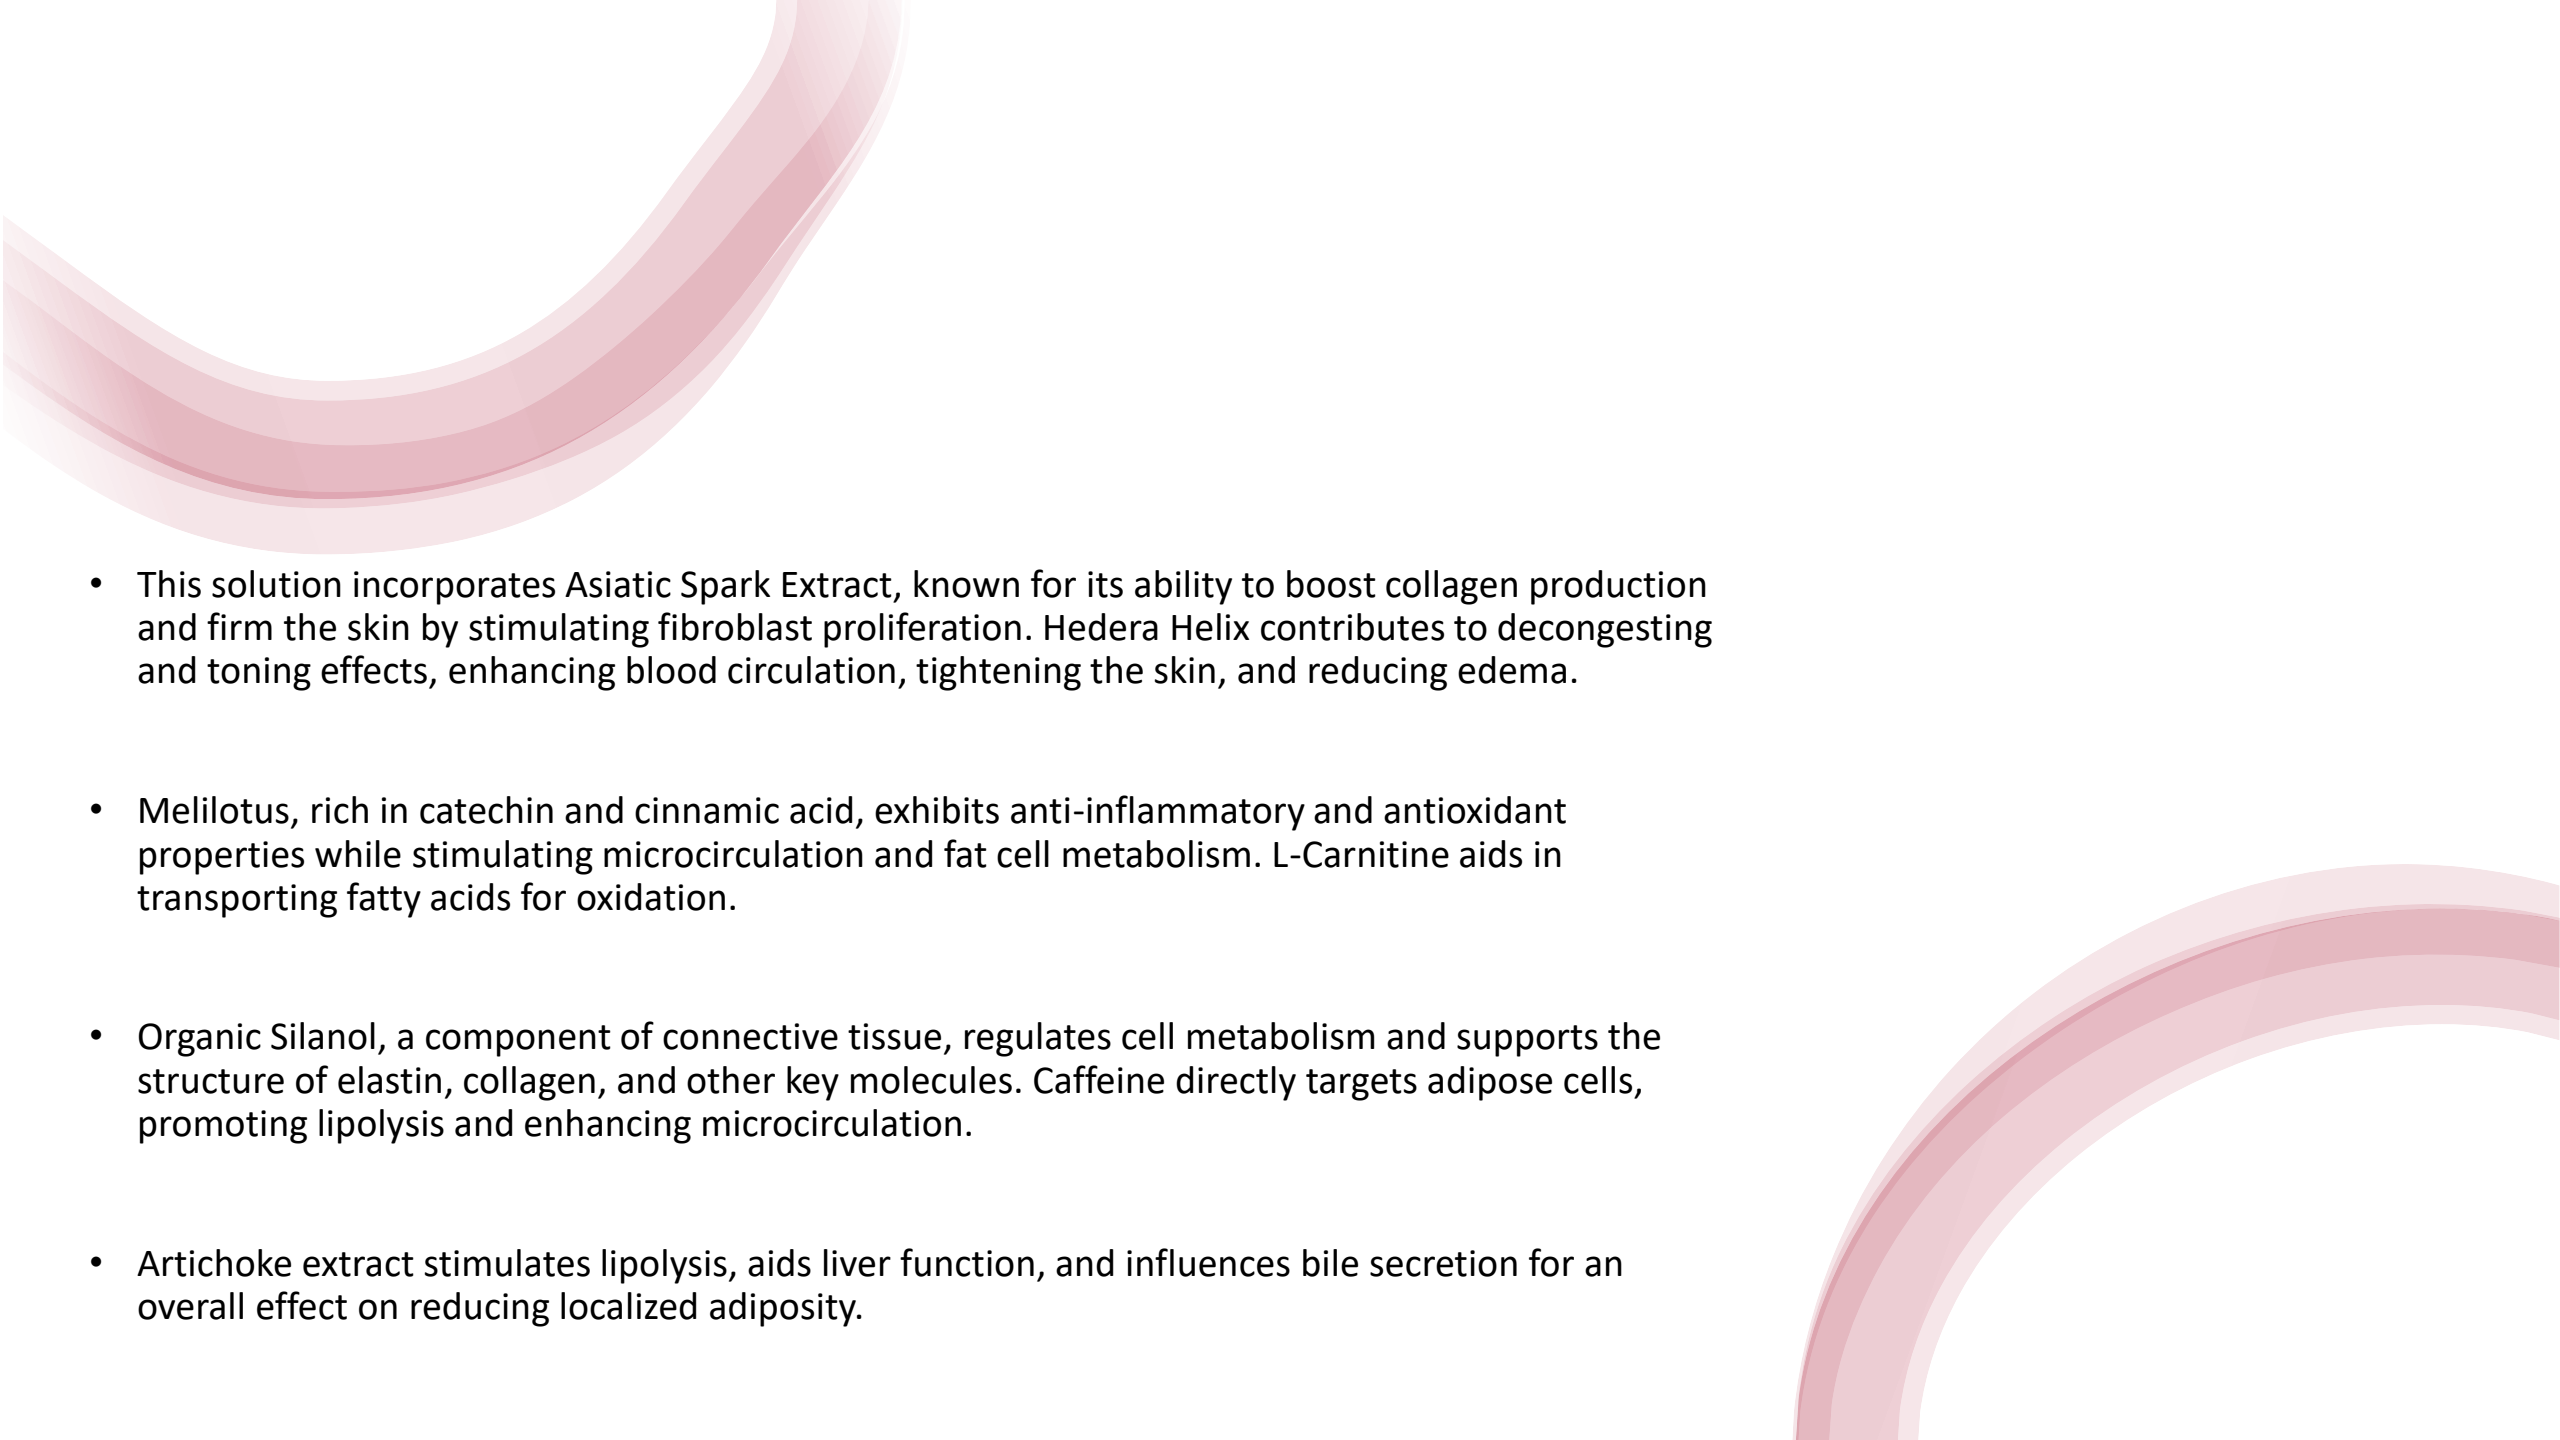

Moreover, Stop Acne stimulates new fibroblast formation, aiding in the recovery of acne-induced marks and depressions by promoting fresh collagen synthesis and increasing elastin production. Enriched with potent healing and regenerative components, including Hamamelis Extract, Calendula Extract, Ginkgo Biloba, Pyruvic acid, Salicylic acid, Meliloto Extract, Asiatic Spark, Artichoke, Troxerutina, Zinc Gluconate, Panthenol, and Hyaluronic Acid Cube 3.

Estilad® Redufat

- Redufat is a sterile solution tailored to reduce localized adiposity in specific body areas. Its formulation harnesses potent natural extracts renowned for their lipolytic, regenerative, and detoxifying properties.

- 
- This solution incorporates Asiatic Spark Extract, known for its ability to boost collagen production and firm the skin by stimulating fibroblast proliferation. Hedera Helix contributes to decongesting and toning effects, enhancing blood circulation, tightening the skin, and reducing edema.
 - Melilotus, rich in catechin and cinnamic acid, exhibits anti-inflammatory and antioxidant properties while stimulating microcirculation and fat cell metabolism. L-Carnitine aids in transporting fatty acids for oxidation.
 - Organic Silanol, a component of connective tissue, regulates cell metabolism and supports the structure of elastin, collagen, and other key molecules. Caffeine directly targets adipose cells, promoting lipolysis and enhancing microcirculation.
 - Artichoke extract stimulates lipolysis, aids liver function, and influences bile secretion for an overall effect on reducing localized adiposity.

Estilad® PPC

PPC stands as a sterile treatment solution renowned for its efficacy in reducing adiposity across diverse body areas. Its composition includes two potent components essential for lipolysis: Phosphatidylcholine and Sodium Deoxycholate.

- Phosphatidylcholine, a choline-based phospholipid, plays a pivotal role in lipid breakdown, mobilization, and elimination. It's a fundamental enzyme produced by the body, serving as a major constituent in cell membranes and circulating lipoproteins within the bloodstream. Its significance extends to regulating cellular metabolic transport, controlling substances' passage in and out of cells. Furthermore, Phosphatidylcholine activates lipase, reducing triglyceride synthesis, and enhances cholesterol transport.
- Sodium Deoxycholate, the sodium salt of deoxycholic acid, is often employed in mesotherapy injections, particularly for targeting fat cells and potentially addressing cellulite. Deoxycholic acid, a primary component of Sodium Deoxycholate, specifically targets adipose fat cells. It induces lipolysis, rupturing fat cells and prompting adipocyte cell death.
- Together, these components in PPC work synergistically to foster the breakdown and elimination of fat cells, providing an effective solution for reducing adiposity and potentially addressing cellulite concerns.

Estilad® Hair Loss

- Hair Loss, a sterile tricologic treatment, combines vitamins, minerals, amino acids, and stem cell growth factors to combat various types of hair loss effectively. This solution extends the hair growth phase, strengthens hair, and addresses alopecia, particularly androgenetic and areata types.

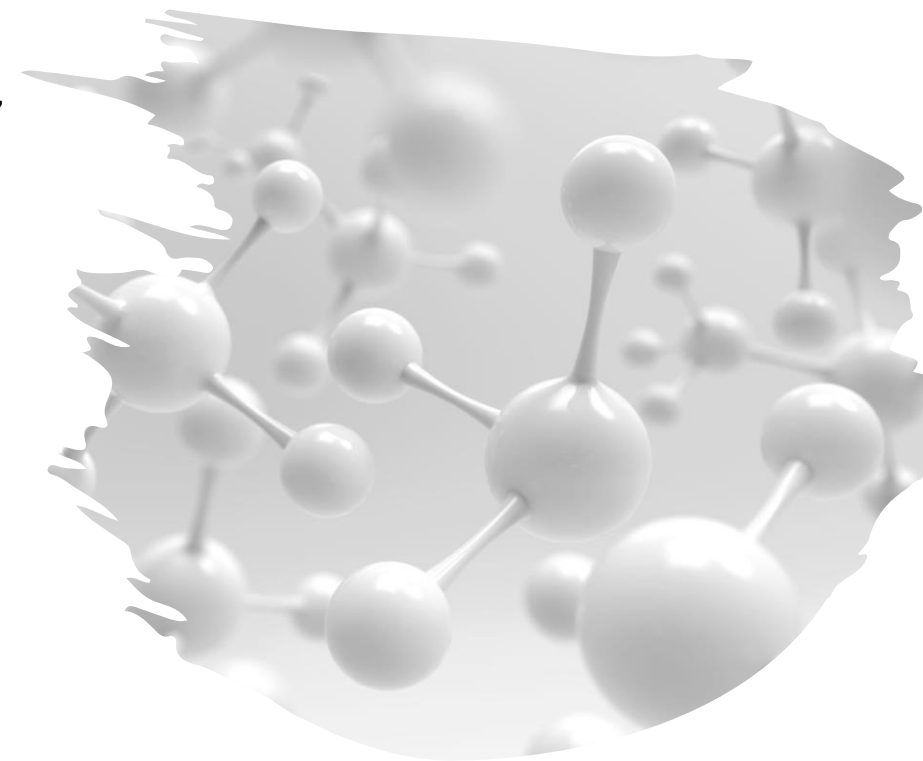

- Key components like Cegaba stimulate cell growth, Capilia Longa reactivates hair growth, Asiatic Spark Extract enhances blood supply, and Panthenol inhibits DHT production.
- Additionally, Organic Silanol boosts dermal molecules, Troxerutin offers protective effects, Riboflavin and Nicotinamide PP strengthen hair, while Biotin, Zinc Gluconate, Ginkgo Biloba, and Hyaluronic Acid Cube3 support cell health, immunity, and hydration.

Estilad[®] COLLAGENA

- COLLAGENA cocktail is a cutting-edge sterile cosmetic solution meticulously crafted for complete skin rejuvenation. This innovative blend incorporates a potent medley of ingredients meticulously formulated to synergistically heighten the skin's biorevitalization and biostimulation mechanisms. The outcome is a profound anti-aging effect, featuring robust firming properties that notably boost collagen synthesis and elevate fibroblast activity, resulting in healthier and more resilient skin.
- At the heart of COLLAGENA's transformative benefits lies Hyaluronic Acid, renowned for its exceptional moisture-locking capabilities. It deeply hydrates the skin, enhancing elasticity and texture by acting as a moisture reservoir, ensuring continuous hydration for a more youthful appearance.

- Hydrolyzed DNA and Hydrolyzed RNA play pivotal roles in the rejuvenation process by aiding in the repair and regeneration of damaged skin cells. These nucleotides significantly amplify the skin's biostimulation, facilitating recovery and renewal.
- The formulation includes essential amino acids—Tryptophan, Glutamine, Leucine, Valine, Methionine, Threonine, Isoleucine, Phenylalanine, Tyrosine, Aspartic acid, Glutamic acid, Glycine, and Cystine—acting as the fundamental building blocks of proteins. They promote collagen production, support skin repair, and enhance overall skin health.
- A wealth of vital vitamins—Ascorbic Acid (Vitamin C), Niacinamide (Vitamin B3), Pyridoxine HCL (Vitamin B6), Folic Acid (Vitamin B9), Panthenol (Vitamin B5), Thiamine HCL (Vitamin B1), and Riboflavin (Vitamin B2)—enrich this solution, delivering essential nourishment. These vitamins bolster skin elasticity and foster a more youthful appearance.
- Augmenting this blend is Copper Tripeptide-1, a peptide complex that aids in skin repair and rejuvenation. It supports collagen synthesis, a crucial component for sustaining youthful and healthy skin.
- COLLAGENA transcends mere cosmetic solutions; it embodies a comprehensive approach to skincare. It offers robust defense against photoaging and revitalizes the skin's vitality, making it particularly effective following exposure to stress, chemicals, or electromagnetic factors.
- With its extensive array of ingredients, COLLAGENA presents an exceptional solution for individuals seeking to rejuvenate and revitalize their skin. Its multifaceted approach addresses various facets of skin health, promoting firmness, elasticity, and overall well-being.

Estilad® Rosy

- ROSY cocktail, a sterile cosmetic solution, is intricately formulated to breathe life into the delicate skin of the lips. Beyond surface-level care, this specialized blend goes deep to rebuild and repair the skin's natural barrier in areas that have undergone damage.
- A standout feature of ROSY cocktail is its formidable antioxidant power. This robust defense shields the lips from the detrimental effects of free radicals, promoting a healthier, more luscious, and naturally pinkish appearance. By safeguarding the delicate lip skin from oxidative stress, this cocktail actively contributes to a revitalized and youthful look.

- A pivotal component is the inclusion of non-crosslinked Hyaluronic Acid (HA), performing a dual role of replenishing vital hydration and imparting elasticity to the lip skin. This results in lips that are not only more supple and well-moisturized but also resilient and youthful.
- Turmeric and Vitamin C play central roles as powerful antioxidants within this cocktail. Beyond their protective benefits, they actively stimulate collagen production, a vital protein responsible for the skin's structure and firmness. Abundant collagen leads to the coveted luminous effect, making lips naturally radiant and appealing.
- Moreover, Ginkgo Biloba, known for its remarkable properties, plays an integral role in this cocktail. It contributes to the rejuvenation of lips, bestowing them with a more youthful and smoother appearance. By enhancing microcirculation, Ginkgo Biloba ensures that your lips receive the nourishment and vitality they deserve.
- In summary, ROSY cocktail is a comprehensive solution that goes the extra mile to transform lips. Its antioxidant prowess, coupled with the rejuvenating properties of non-crosslinked HA, Turmeric, Vitamin C, and Ginkgo Biloba, results in lips that exude health, vibrancy, and a captivating natural pinkish glow.

Estilad® FHACE CHARM

- Introducing ESTILAD FHACE CHARM an exemplar of luxury and efficacy in the domain of skincare solutions. Imagine a seamless skincare experience, meticulously pre-filled into convenient syringes, ready to deliver a rejuvenating cocktail directly to your skin with precision and ease.
- With ESTILAD FHACE CHARM, achieving radiant, youthful skin is as effortless as it is indulgent. Each pre-filled syringe contains a potent blend of transformative ingredients, carefully selected to address a wide range of cosmetic needs, and unveils a revitalized, harmonious visage.

- At the forefront of our innovative formula is DIMETHYLAMINOETHANOL TARTRATE, a powerhouse compound known for its skin-firming properties, working in perfect harmony with Sodium Hyaluronate to replenish moisture and restore youthful plumpness to your skin.
- Continuing the narrative of transformative efficacy, Sodium DNA's profound ability to penetrate the skin at a cellular level triggers robust rejuvenation processes, unveiling a visibly revitalized complexion from the dermal depths.
- Additionally, Silanetriol, a fundamental component within our formula, facilitates a remarkable refinement of skin texture, resulting in a luminous, radiant glow that embodies youthful vibrancy.
- Each syringe of ESTILAD FHACE CHARM is fortified with a concentration of hyaluronic acid at 1.8%, ensuring maximum hydration and rejuvenation for your skin.
- We understand the importance of gentle care, which is why each syringe of ESTILAD FHACE CHARM is enriched with Panthenol, renowned for its soothing properties that promote skin healing and elasticity, ensuring a comfortable and rejuvenating experience with every application.
- To preserve the integrity and potency of our formula, we've incorporated Potassium Sorbate and Sodium Benzoate, gentle yet effective preservatives that maintain the freshness of your skincare cocktail, ensuring optimal results with every use.
- Experience the apex of skincare innovation with ESTILAD FHACE CHARM, a pre-filled solution that elevates your beauty routine to new heights.
- Say goodbye to complex skincare regimens and hello to radiant, youthful skin with just a simple touch.

Estilad Fhace Genessa

Estilad Genessa combines high and low molecular weight hyaluronic acid for surface hydration and deep rejuvenation, while **calcium hydroxyapatite** stimulates collagen production, enhancing elasticity and firmness for a youthful, radiant complexion.

FHACE Genessa Transformative Skin Booster

Key Benefits:

- **High Molecular Weight Hyaluronic Acid (16mg)**
 - Provides intense surface hydration
 - Creates a plump, dewy appearance
 - Locks in moisture throughout the day
- **Low Molecular Weight Hyaluronic Acid (16mg)**
 - Penetrates deeply to hydrate at the cellular level
 - Supports skin renewal
 - Reduces fine lines & wrinkles for a smoother texture
- **Calcium Hydroxyapatite (CAHA)**
 - Stimulates collagen production
 - Enhances skin elasticity & firmness
 - Combats sagging for a youthful appearance
- **Proline & Glycine**
 - Support collagen synthesis and tissue repair
 - Improve skin texture and promote radiance

The background features two decorative, wavy, pink lines. One line starts from the left edge and curves upwards and to the right, ending near the top center. The other line starts from the bottom right edge and curves upwards and to the left, ending near the center. Both lines have a soft, layered appearance with varying shades of pink.

THANK
YOU
